***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claim(s) 1, drawn to a four point contact ball bearing having a plurality of structural limitations to define a particular configuration, such as ball diameter, pitch diameter, a distance between centers of adjacent ones of the balls on the pitch circle, a curvature radius of each of grooves serving as the raceway surfaces circumscribing the ball, and a contact angle between the ball and each of the raceway surfaces of the outer and inner races.

**Group II**, claim(s) 2, drawn to a four point contact ball bearing, wherein each of the balls are made of high-carbon chrome steel; and a cabonitrided layer having Vickers hardness Hv of 740 to 940 is formed on a surface of each of the balls.

**Group III**, claim(s) 3, drawn to a four point contact ball bearing, wherein the balls are made of martensitic stainless steel; and a cabonitrided layer having Vickers hardness Hv of 1200 to 1500 is formed on a surface of each of the balls.

**Group IV**, claim(s) 4 drawn to a four point contact ball bearing, wherein the balls are made of engineering ceramics; and a surface of each of the balls has Vickers hardness Hv ranging from 1300 to 2700.

2. The inventions listed as Groups I to IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claims 1 to 4 define the single general concept of a four point contact ball bearing having an inner member defining an inner race, an outer member defining an outer race, an a retainer for spacing a plurality of balls. However, the single general concept defined by claims 1 to 4 is not considered inventive as it was well known in the art to provide a bearing with the claimed features.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
